Re: *Unlicensed Use of the 6 GHz Band*, ET Docket No. 18-295

Expanding Flexible Use in Mid-Band Spectrum between 3.7 and 24 GHz,
GN Docket No. 17-183

Dear Ms. Dortch:

On October 10, 2018, representatives from Apple Inc., Broadcom Inc., Cisco Systems, Inc., Facebook, Inc., Google LLC, Hewlett Packard Enterprise, Intel Corporation, Marvell Technology Group, Microsoft Corporation, Qualcomm Incorporated, and Ruckus Networks, an ARRIS Company met with representatives of the Office of Engineering and Technology. On October 11, representatives from the above companies met separately with Commissioner Michael O’Rielly and his Legal Advisor Erin McGrath; Will Adams, Legal Advisor to Commissioner Brendan Carr; Umair Javed, Legal Advisor to Commissioner Jessica Rosenworcel; and Rachael Bender, Wireless and International Advisor to Chairman Ajit Pai. A complete list of participants is attached to this letter.

In these meetings, we expressed our gratitude for OET’s hard work on the draft Notice of Proposed Rulemaking in this proceeding, which represents a critical next step in opening the 6 GHz band to unlicensed broadband use while protecting licensed incumbents. In addition, we discussed areas where additional questions would lead to the development of a complete record. First, we suggested that the Commission consider additional questions on low-power indoor operations throughout the 6 GHz band and provide more specific guidance about the types of evidence that would be most useful to the Commission in assessing the feasibility of these operations in each 6 GHz sub-band. Second, we suggested that the Commission consider additional questions about the use of portable access points in the 6 GHz band, which have proven to be a key use case in the 2.4 GHz and 5 GHz unlicensed bands. Finally, we suggested that the Commission solicit comments on how technical rules governing transmitters can promote rural broadband deployment in the 6 GHz band.

Ms. Marlene H. Dortch
